

*Prince George's County Government and its Sustainable Energy Program will not be held liable or responsible for actions taken via the implementation of Prince George's Solar Co-op program operated by MD SUN. Prince George's County Government and its Sustainable Energy Program is supporting this initiative by publicizing various efforts via its media outlets and assist with the identification of stakeholders interested in hosting informational sessions and potentially installing solar systems. Prince George's County Government and its Sustainable Energy Program will not be held responsible for any costs associated with the design and implementation of the Prince George's Solar Co-op process, including but not limited to: the purchase of MD SUN solar co-op marketing materials, solar feasibility assessments, design, construction, purchase, installation, and permitting of solar systems. Moreover, the Prince George's County Government and its Sustainable Energy Program will not participate in the community's solicitation, contract negotiation, and selection of solar installer(s) process or be held liable for any final outcomes resulting from these actions or others of the Prince George's Solar Co-op.*
