

Calling all Texas Solar Owners! Understand how to maximize the value of your solar and reduce your energy bills. The answer is different depending on when you use energy and how much solar you produce. Our preliminary analysis shows that savings significantly vary across net metering programs. **Sign up today and we will give you a free customized report!**

Energy Consumption & Production (Annual)

% Energy Consumption			
Sleep (12am-6am)	Morning (6am-9am)	Day (9am-3pm)	Evening/Night (3pm-11pm)
11%	5%	56%	28%

- Your solar panels can offset **82%** of your energy bill
 - Without net metering, your solar panels offset **67%**
 - With net metering, you can sell **15%** of your solar production back to the grid
 - Depending on your energy supply contract, you may not be fully compensated for your excess production
- See how much you can save on your energy bills from net metering below.

Value of Net Metering

With net metering, you can save up to an additional 11% on your utility bill and reduce your payback period by almost 1 year. These savings are based on a 1:1 net metering rate at average retail price of \$0.11/kWh buyback rate – choose a program below to maximize these savings.

Net Metering Program Comparison

Not all net metering programs are created equal and vary depending on your energy usage and solar exports. A program that offers 1:1 net metering often pays you more for exported energy but does not guarantee the maximum savings.

	Provider 1	Provider 2	Provider 3	Provider 4
1:1	Yes	No	Yes	Yes
Retail Rate	\$0.098	\$0.117	\$0.129	\$0.159
Net Metering Rate	\$0.098	\$0.106	\$0.129	\$0.159
Energy Usage Cost	\$814.00	\$971.81	\$1071.49	\$1320.67
Net Metering Revenue	\$315.89	\$341.68	\$415.82	\$512.52
Bill	\$498.10	\$630.13	\$655.67	\$808.15
Net Metering Savings	13%	9%	8%	3%

Just provide us your energy data and we'll send you a free, custom report like the one above. **You will be contributing to an important non-profit study.** Email txnetmetering@solarunitedneighbors.org if interested!
